

Instructions for “She Rules!” and “Double - She Rules!”:

Unlike most games, players are given the ANSWER and must respond with the correct QUESTION. The player selects one of the six categories and any one of the point values, in that category, shown on the game display – generally, the higher the point value, the greater the degree of difficulty.

Click on the point value selected to reveal the ANSWER. The player then responds in the form of a QUESTION. After the player responds, click on the ANSWER to reveal the correct QUESTION. Add the point value of the ANSWER to the player’s score if the player provided the correct QUESTION; otherwise subtract the points from the player’s score. Click on the QUESTION to return to the game display.

Continue until all the point values have been selected. Then click on the arrow in the upper right of the game display to go to the “*Double - She Rules!*” round, where the point values are doubled. At the end of the “*Double - She Rules!*” round, click on the arrow in the upper right of the game display to go to “*Final - She Rules!*”.

Daily Double:

There is one Daily Double hidden in the “*She Rules!*” round and two in the “*Double - She Rules!*” round. When a player selects a point value and a Daily Double is revealed, the player determines the point value to wager. Players can wager any or all of their points. Or, players can wager up to 1,000 points in the “*She Rules!*” round or up to 2,000 points in the “*Double - She Rules!*” round, if they don’t have that many points to wager. Once the wager is made, click on the Daily Double to reveal the ANSWER.

“Final - She Rules!”:

All players who have points from the earlier rounds compete together in “*Final - She Rules!*”. This is the last chance for players to increase their points. There is only one ANSWER.

The “*Final - She Rules!*” screen shows the one category for the final round. Players then decide how many points to bet – from zero to all of their points. After all players have written down their bets, click on the “*Final - She Rules!*” screen to reveal the ANSWER. After all players have written down their QUESTIONS, click on the ANSWER to reveal the correct QUESTION. Then, total up the final score based upon what each player bet.

Click on the “*Final - She Rules!*” QUESTION to go to the final screen. Click on the final screen to end the game. To exit the game at any time, press the ESC (Escape) key on the upper left hand corner of the keyboard.
